

# TACKY TRAXX™ ALERT!

PATENT PENDING

## Safety First!

New Tacky Traxx Alert!™ tackified mats are so bright that you would think they are electric but they are not. The frame's edges below the mat emit a bright yellow/green glow.

Tacky Traxx Alert!™ mats are designed and developed to be highly visible. This new design can help reduce accidental tripping and injuries. It will also ensure that the mats are being used and will reduce contamination in controlled environments.

A complete unit consists of a reusable high visibility base frame with a tackified 30-sheet mat on its surface. Each numbered mat can be replenished (see below).

The Tacky Traxx Alert!™ is available with a gripper backing that allows it to be placed on virtually any surface including carpet. The gripper backing allows it to be moved anytime. It is also available with a two-sided tape for more permanent placement on a dry, clean, and flat surface.

## ORDERING

Item	Description	Packaging
TTFG-ALERT!	24" x 31" Frame with glowing edges, with <b>gripper base</b>	1 Unit
TTFT-ALERT!	24" x 31" Frame with glowing edges, with <b>double-sided tape base</b>	1 Unit
TT-2230-38CL	Clear Tacky Mats	30 sheet/mats 8 mats/case
