

# 96% Isopropyl Alcohol Electrofusion Wipes

## Features and Benefits

- Ideal wipe for the electrofusion process
- 96% IPA concentration allows for rapid evaporation
- Eliminates the need to handle large containers of IPA
- Made with cleanroom grade poly-cellulose fabric
- Packaging provides lot-to-lot traceability

## Created to Clean the Fusion Zone

The FS-NT1-69.96 wipe removes debris, dirt, oxides, and other contaminants from a variety of surfaces including HDPE pipes. These wipes are made with strong, durable hydro-entangled fabric that will not tear easily. They are convenient, economical, and disposable. They are perfect for cleaning plastic pipes prior to electrofusion and are widely used by utility companies. They are also ideal for a variety of general purpose wiping applications including cleaning work stations, equipment, machinery, and more.

- Improves Weld Integrity
- Fast Drying

## Packaging:

SKU #	Size	Saturation	Wipes/Unit	Units/Case
FS-NT1-69.96	6" x 9"	96% IPA / 4% DI Water	100 Wipes/Roll	9 Canisters/Case
