Bench Top Protector Mat

Surface Protection for Lab Workstations and Prep Areas

Bench Top Protector Mats are ideal for laboratory workstations, perfect for protecting glassware and absorbing liquids. These mats are designed to quickly and safely remove spills before they spread. Additionally, they feature a non-porous polyethylene backing that will prevent liquids and chemicals from penetrating through.

Features & Benefits

- · Absorbent, 3 ply material
- · Non-shedding polyethylene fiber blend
- Polyethylene backing keeps mat in place
- Sizes: 16" x 11", 22" x 16"
- · Non-porous polyethylene backing
- · Ideal for ISO class 5 cleanrooms and higher
- · Made in the USA
- 50 Mats/Bag, 4 Bags/Case (200 Mats/Case)
- Compare to KIMTECH SCIENCE® Bench Top Protector

Applications

- Laboratory workstations
- · Surface mat for handling chemicals
- Lab preparation
- Spill protection
- Absorbent and soft surface ideal for protecting glassware
- · Soaking liquids during experiments
